 TWG Meeting

 Public/Stakeholder Engagement

# Strategic Network Package Identification Process Review

# Methodology Overview

# Identify Strategic Network Packages

## Package 1. Maximize Need-Based Connectivity

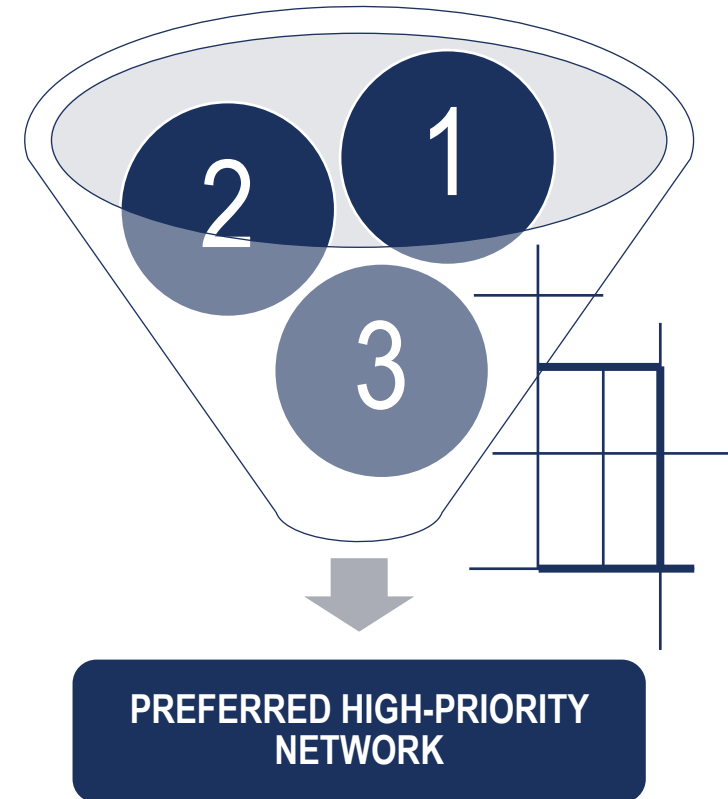

Focus the high-priority network on areas with high active transportation propensity and limited active transportation options.

## Package 2. Maximize Overall Accessibility

Focus the high-priority network on reaching the maximum number of potential active transportation trips across the PAG region.

## Package 3. Maximize Safety

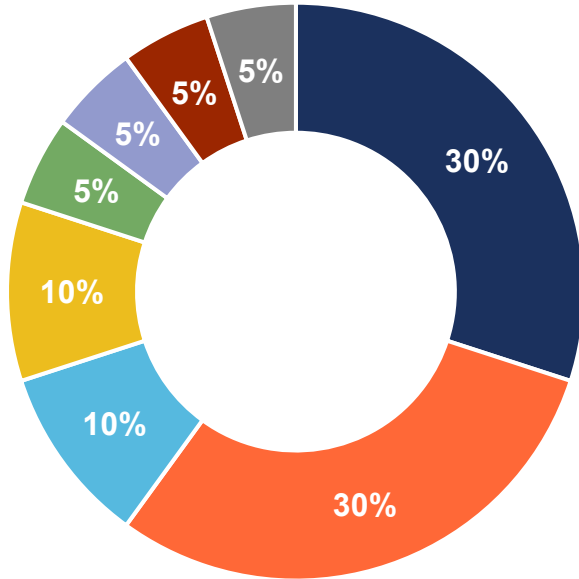

Focus the high-priority network on addressing data-driven and perceived active transportation safety issues.

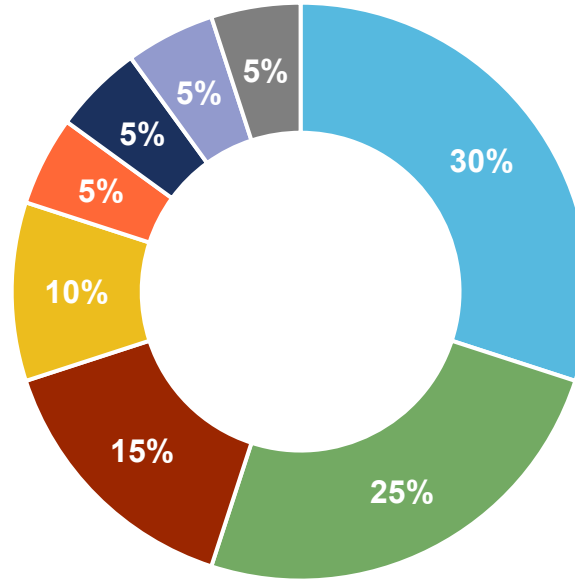

# Develop Evaluation Criteria and Weighting

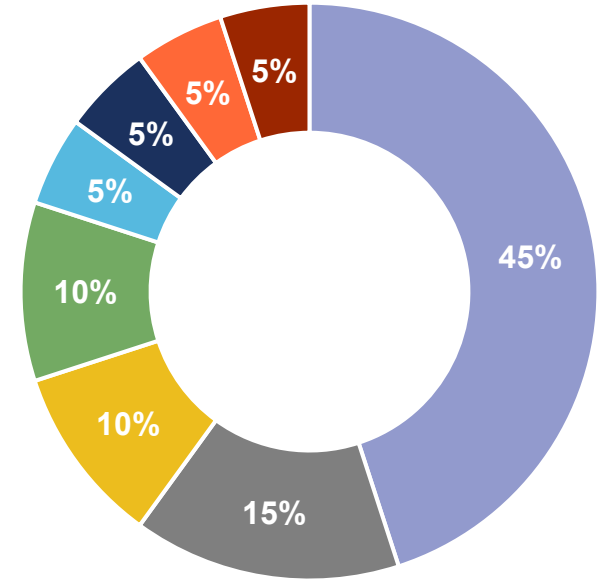

## Maximize Need-Based Connectivity

## Maximize Accessibility

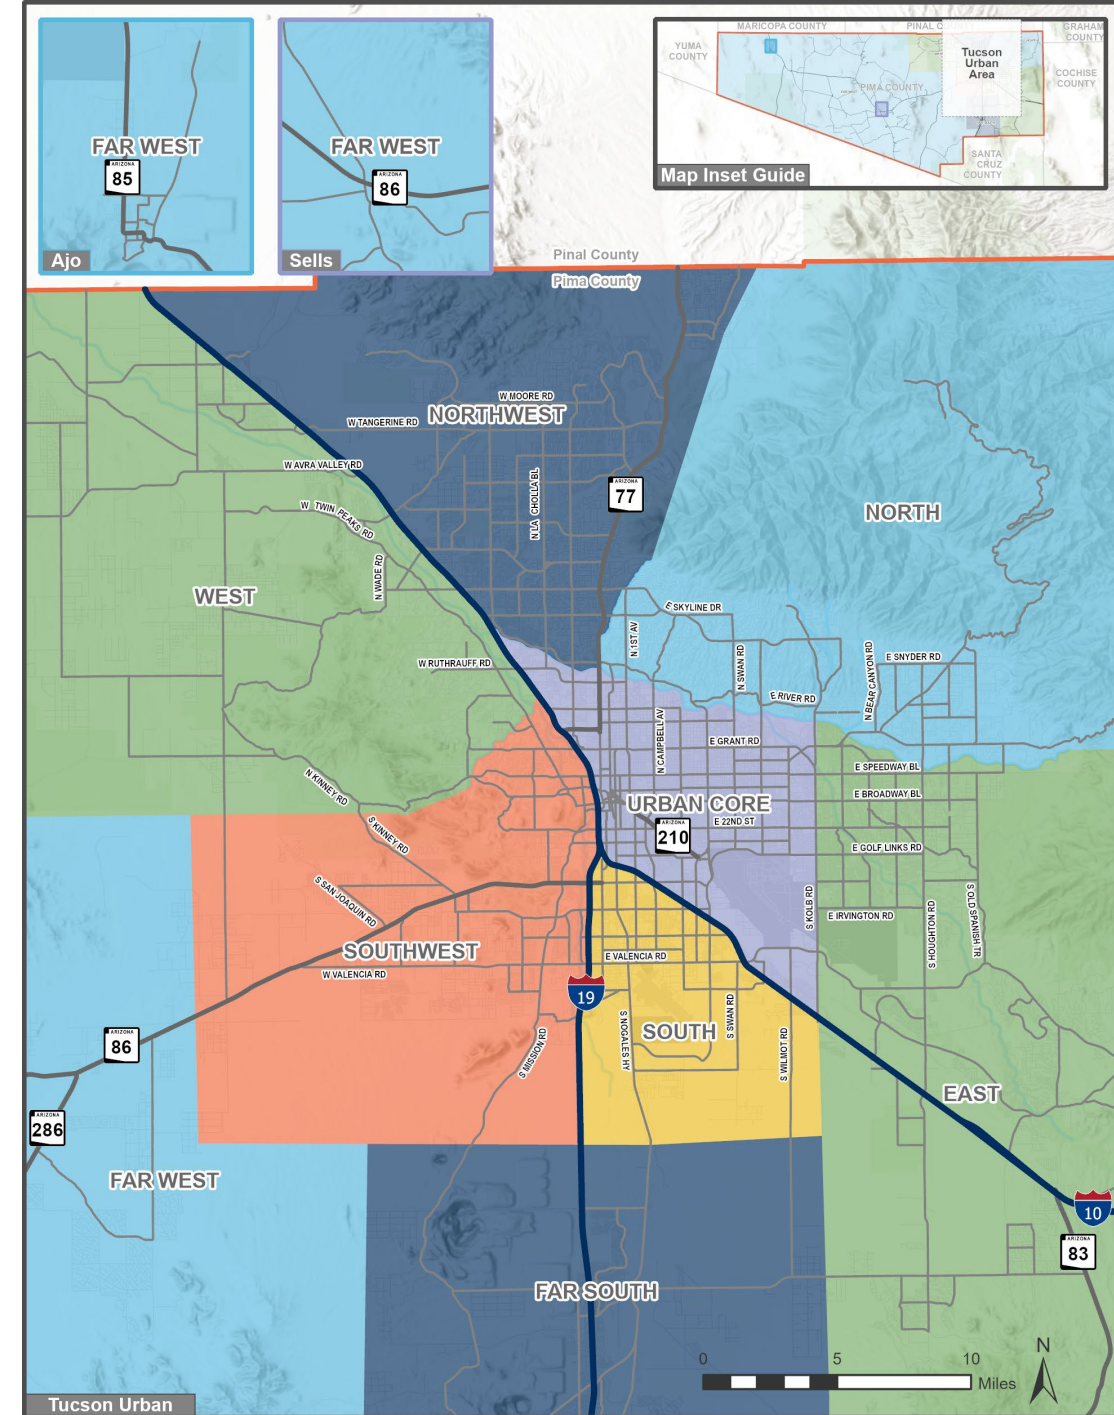

## Maximize Safety

Public Health	Active Trip Potential	Travel Time	Connectivity
Traveler Alignment and Crossing Demand	Safety	Accessibility	Public Engagement

# Develop High-Priority Networks by Geographic Area

9  
Geographic  
Areas

# Draft Strategic Network Package Alternative Results

# Preferred High-Priority Network Discussion

# Preferred High-Priority Network Options

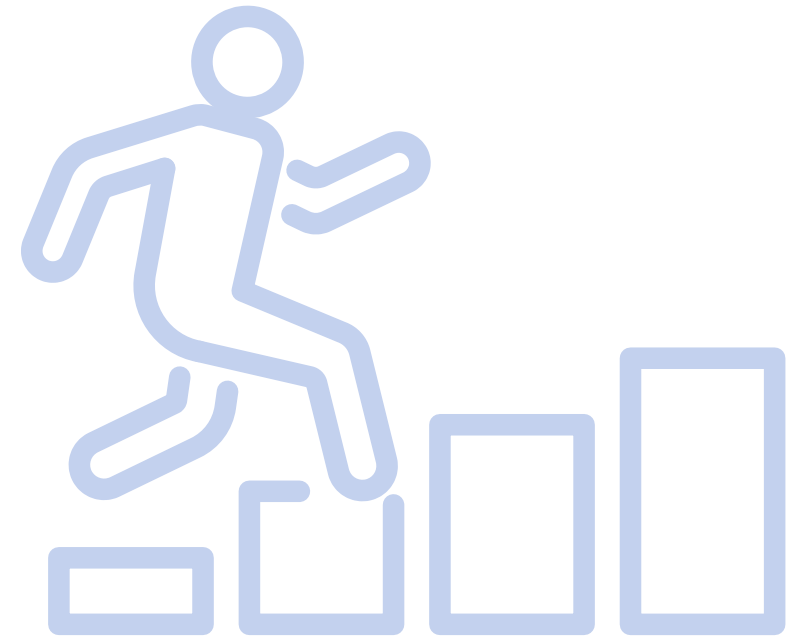

- Use one of the scenario networks.
- Use the segments that show up in the most scenario networks.
- Adjust the evaluation criteria weighting and develop a new network.
- Other options.

**Next Steps**

## Next Steps
